Value Customers,

## CERTIFICATE OF ENVIRONMENTAL RADIOACTIVITY LEVEL

This is the certificate of Tamagawa products, made in Iida factories, Nagano prefecture and Hachinohe factories, Aomori prefecture are not affected by radioactivity from Fukushima atomic power plant disaster in Japan. All Tamagawa factories locate far distance around 400km from Fukushima prefecture and both Nagano and Aomori prefectures stay normal and not affected even after the Nuclear and Industrial Safety Agency (NISA) April 12, 2011 raised the severity of the incident from level 5 to 7.

In accordance with the official Environmental Radioactivity Level by Prefecture report published by the Ministry of Education, Culture, Sports, Science and Technology of Japan, Tamagawa hereby notifies you of recent environmental radioactivity level monitoring results in the principal city of the prefecture in which the manufacturer produced for exportation described below. This is one of the most reliable sources of information on environmental radioactivity levels in Japan. In addition to the above, Tamagawa certifies that the annualized radiation dose in Item 3-b. is below the individual dose limit (public exposure) in a year (cites in International Commission on Radiological Protection (ICRP) publication 103)

1. Monitoring date: Aug 7, 2011
2. Monitoring site (as described above): Nagano city, Nagano Pref. and Aomori city, Aomori pref. Japan
3. Monitoring results:
  - a. Average radiation dose : Nagano: 0.041  $\mu$  Sv/h, Aomori: 0.029  $\mu$  Sv/h
  - b. Annualized radiation dose(a. x 24h x 365d):  
Nagano: 359.16  $\mu$  Sv/year, Aomori: 254.04  $\mu$  Sv/year
4. Individual dose limit (public exposure) in a year (cites in ICRP publication 103): 1,000  $\mu$  Sv/year
